

Notice to Residents on Rolling Creek

Resurfacing Work to Start Soon

This notice is to inform you that the City of Converse Public Works Department and Andale Construction will be working on your street in the next few weeks to complete much needed street resurfacing (with weather permitting).

Andale Construction crews will be doing a resurfacing procedure that requires the use of heavy machinery and materials so it is essential that your personal vehicle be removed off the street. We will be putting out orange and black signs that say **REMOVE VEHICLES FROM CURB**--this is a Courtesy that the work will be done on your street on that particular day. **Any vehicles that are not moved will be towed.** Also, please **Do not water your lawn** when the orange & black signs are on your street. Moisture has an adverse impact on the material and affects the structure of the pavement.

We will try to keep disruptions to a minimum however, please know that there will be detours and inconveniences until the work is complete. Our apologies in advance for disruptions but we believe you will be very happy with the road work once it is complete.

Rolling Creek
